Art Unit: 1653

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups 1-110, claim(s) 1-9 and 14-21, drawn to zinc finger nucleotide binding proteins comprising any of SEQ ID NO: 1 – 110, respectively.

Groups 111-220, claim(s) 10-13, drawn to polynucleotide encoding zinc finger nucleotide binding proteins comprising any of SEQ ID NO: 1 – 110, respectively.

The inventions listed as Groups 1-220 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: SEQ ID NO: 1 differs in structure and in function from the polypeptides comprising SEQ ID NO: 2-110 and the polynucleotides encoding SEQ ID NO: 1-110. Therefore, the special technical feature of SEQ ID NO: 1 is distinct from Groups 2-220.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant may wish to review their claim language. Claim 1 is drawn to individual proteins. Claim 2 is drawn to a composition comprising 2 to about 12 of a specific protein of claim 1. Claim 4 is drawn to the fusion or repeat of the same protein and so on. It appears that the intention for the composition is that a single polypeptide will comprise from 2 to about 12 nucleotide binding regions, each region selected from the group consisting of SEQ ID NO: 1-110?

Art Unit: 1653

If so, Applicants may wish to amend the claims prior to examination to more clearly present this idea. Also, only a single amino acid sequence can be searched.

If Applicants desire more than a single sequence to be searched, Applicant must point out which sequences can be searched together using a single, specific amino acid sequence that Applicants will specify. If that sequence specified by Applicants is found, then all of the sequences pointed out by Applicant that can be searched with that specific sequence will be considered obvious over the specific sequence.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Cochrane Carlson, Ph.D. whose telephone number is 703-308-0034. The examiner can normally be reached on 7:00 AM - 4:00 PM, off alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Christopher Low can be reached on 703-308-2329. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
